Number of People Survived by Age in Titanic Disaster

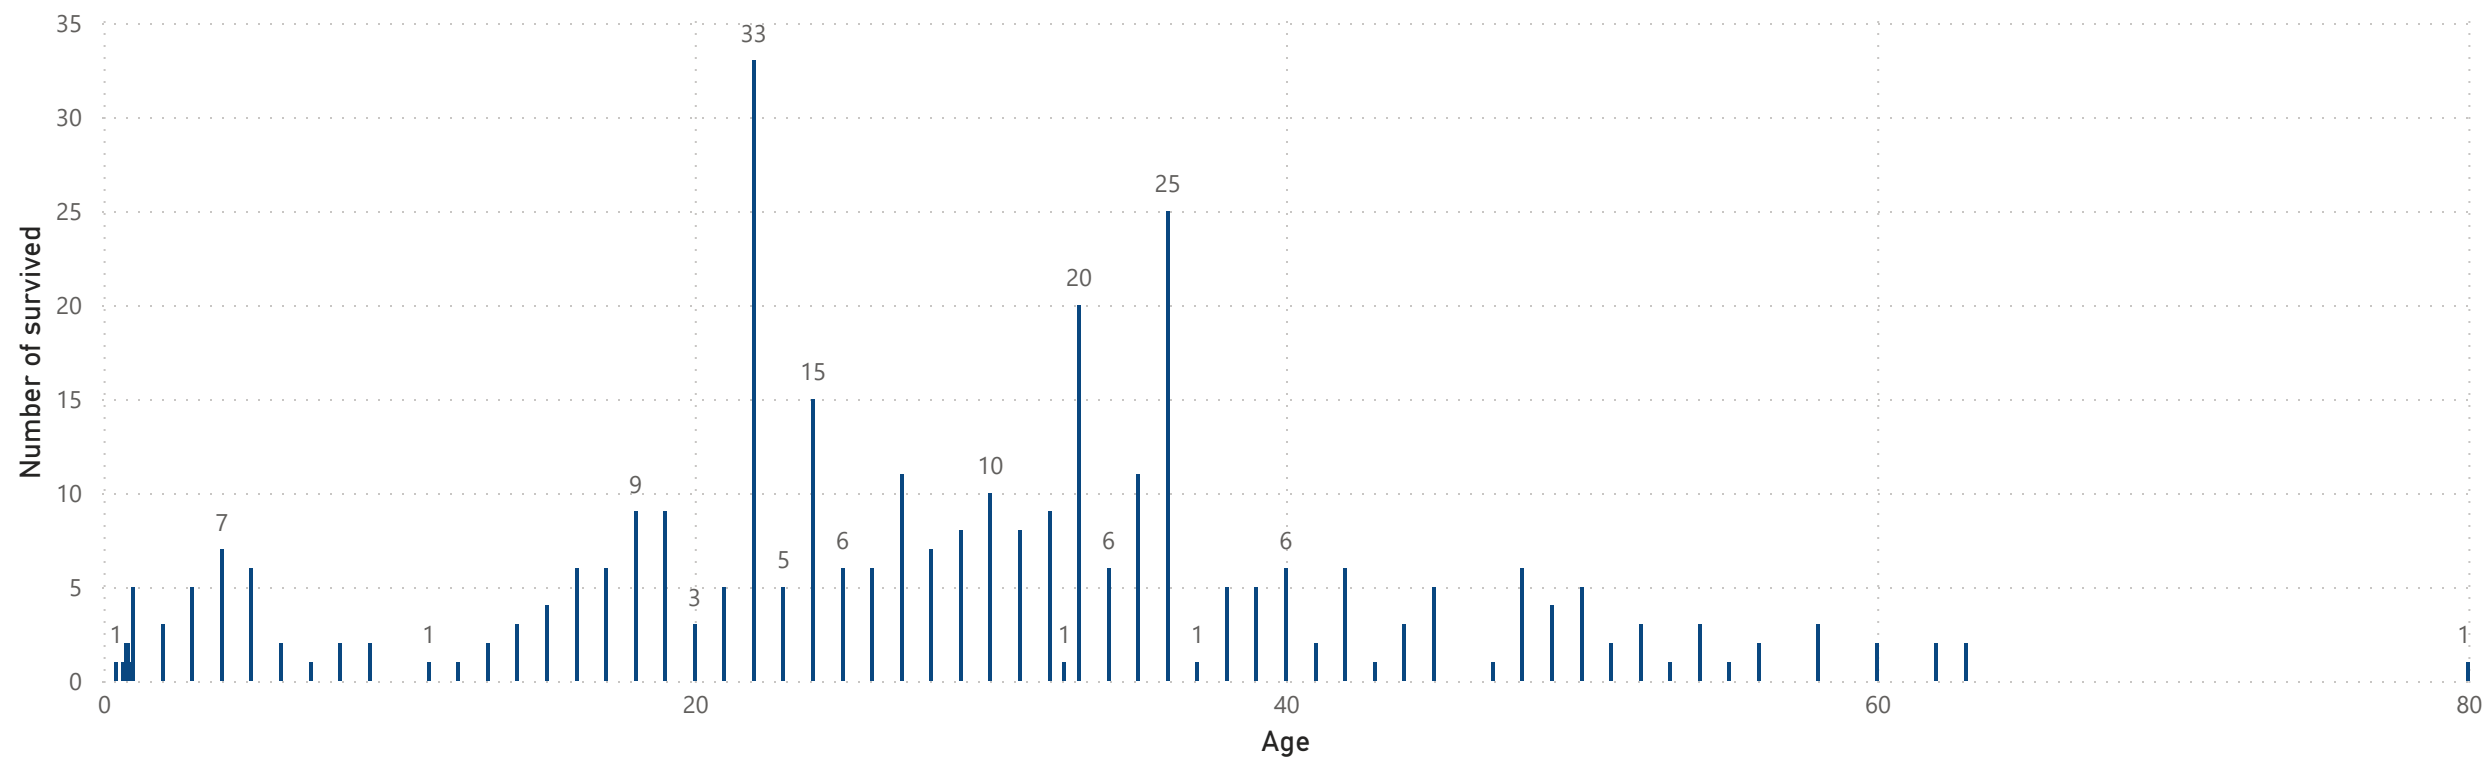

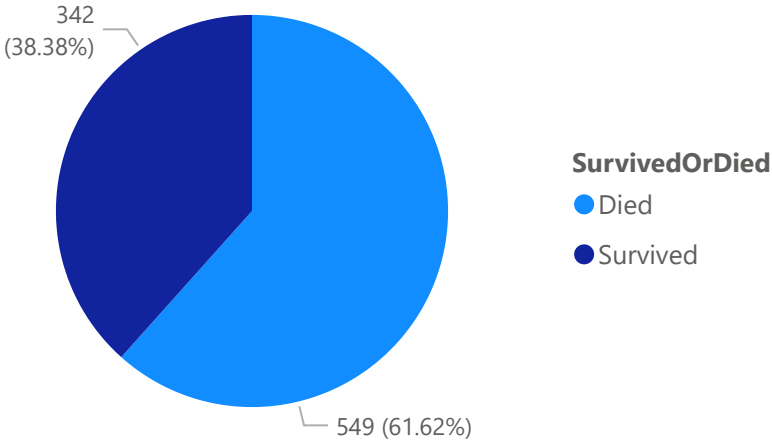

This bar chart illustrates **the survival rates across various age groups** on the Titanic. The y-axis represents the number of survivors, while the x-axis divides passengers into age categories.
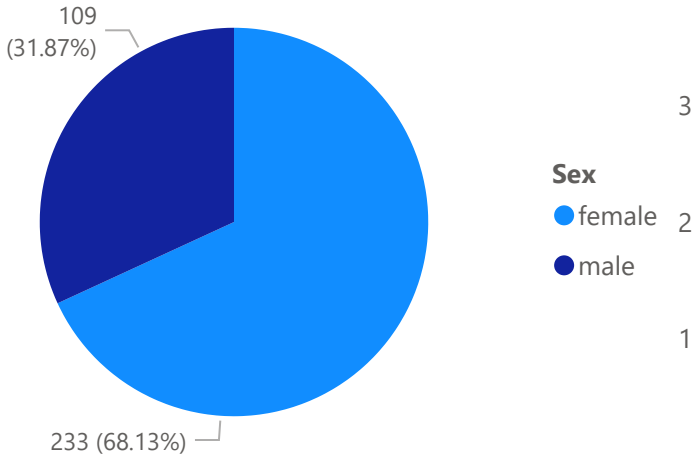

Preparing Q&A

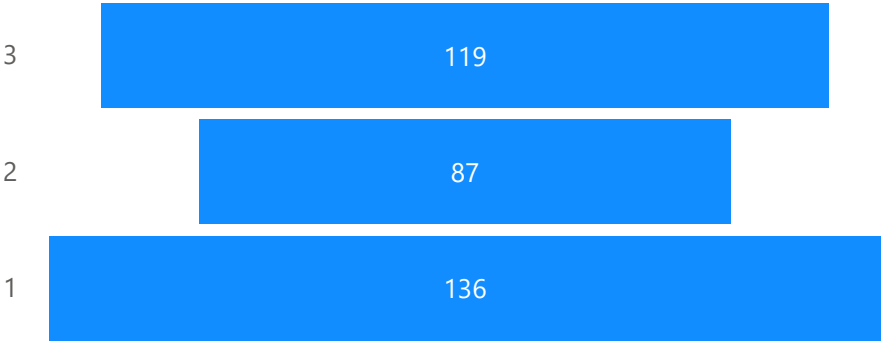

342 (38.38%)

549 (61.62%)

SurvivedOrDied
- Died
- Survived

This pie chart starkly illustrates **the proportion of passengers who survived** the Titanic disaster **compared to those who perished**.

109 (31.87%)

233 (68.13%)

Sex
- female
- male

This pie chart visualizes the stark **difference in survival rates between men and women** aboard the Titanic.
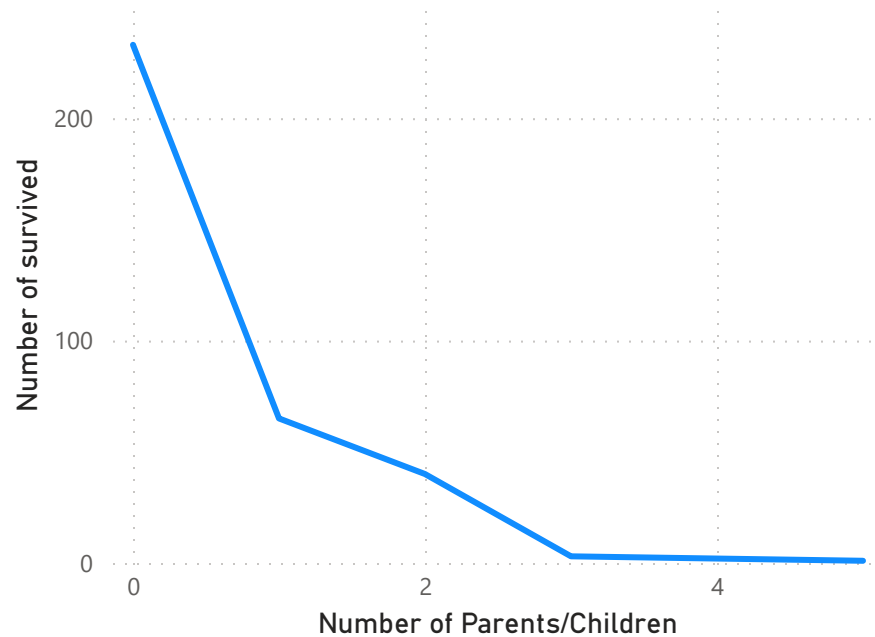

3 — 119
2 — 87
1 — 136

This funnel chart reveals the **significant differences in survival rates among 1st, 2nd, and 3rd class passengers** on the Titanic.
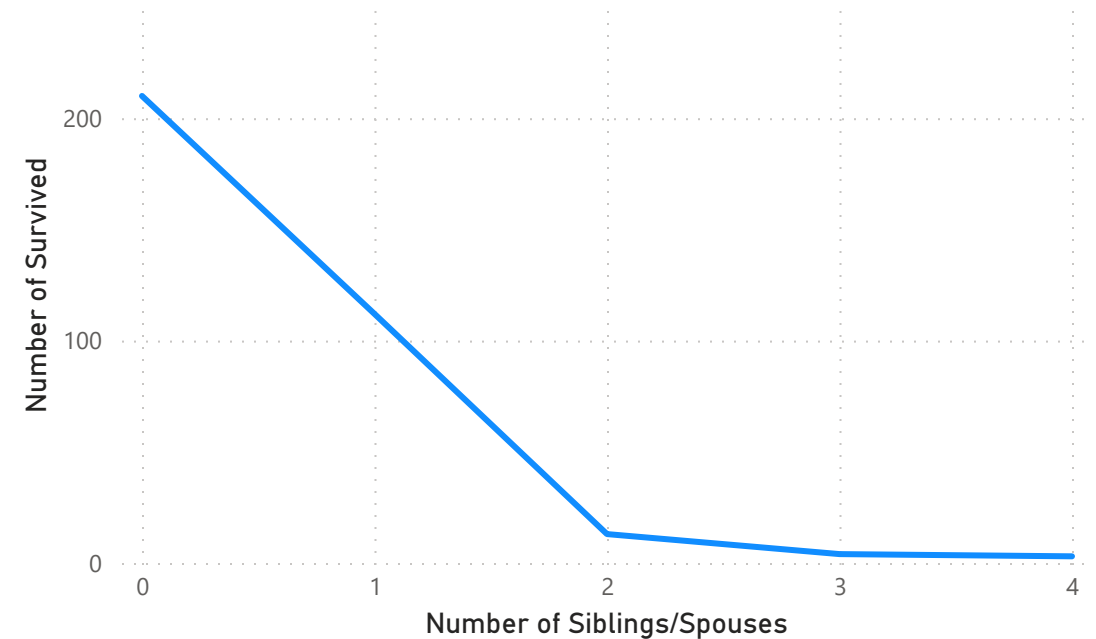

The Impact of Family Size on Titanic Survival Rates

This line chart illustrates the relationship between the **number of parents and children** aboard the Titanic and **an individual's chances of survival.**

## Survival Rate by Number of Siblings/Spouses

This line chart investigates whether the **number of siblings or spouses traveling with a passenger** affected their **likelihood of surviving** the Titanic disaster.
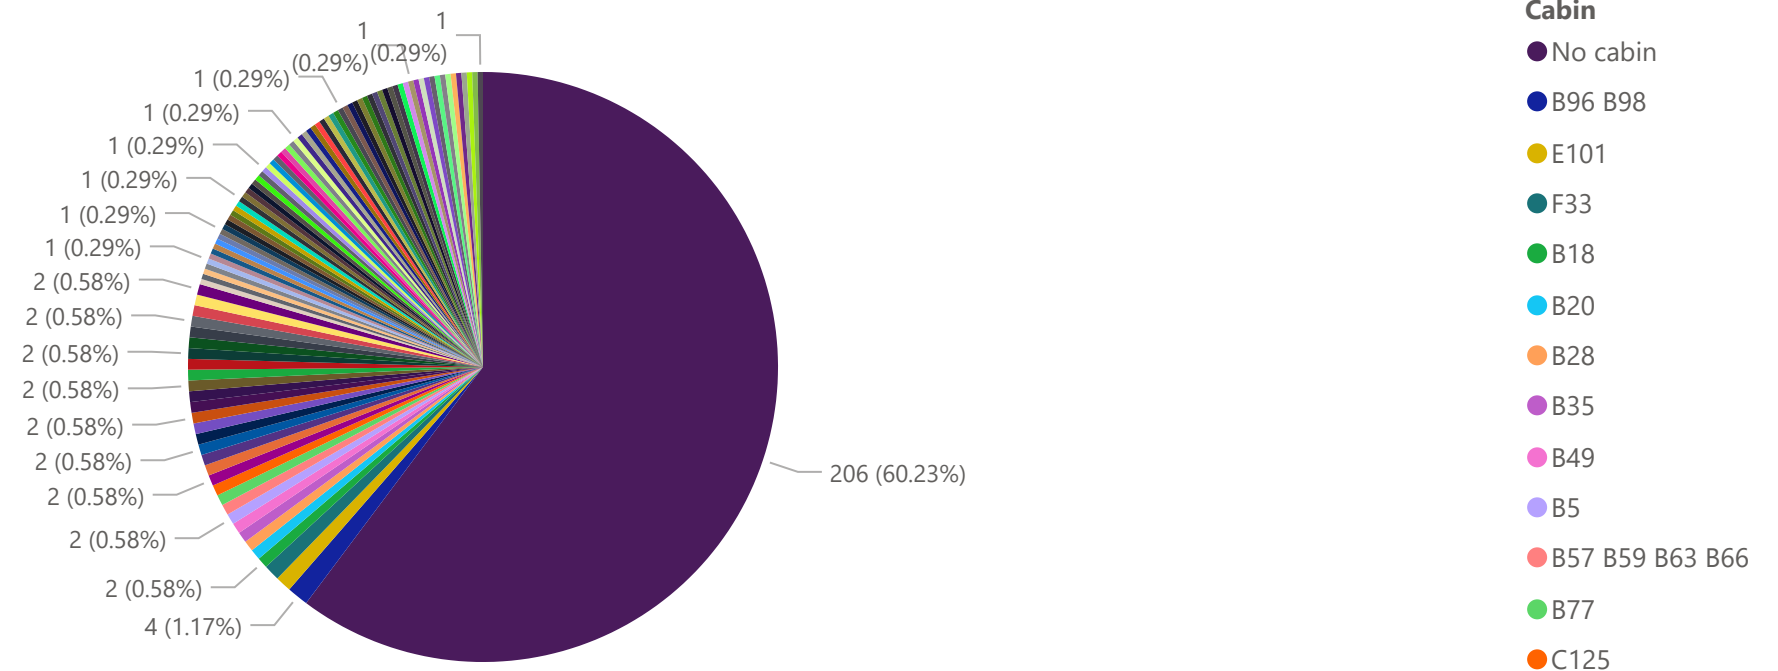

Number of survived by Fare

This line chart examines the **potential correlation** between the **fare paid by a passenger** and their **likelihood of surviving** the Titanic disaster.

Survival rate by cabin

The pie chart above illustrates the **survival rates** among passengers grouped by **cabin**.

Survival rates by Port of Embarkation

Port of Embarkation

- S
- C
- Q

30 (8.77%)

93 (27.19%)

219 (64.04%)

The **impact** of the **port of embarkation on survival** outcomes.
